BUILDING MADE BETTER.

A typical hospital patient room toilet contains 800 components field installed by a dozen trades over a three-month span. Imagine replacing that complexity with a single component, installed by a single trade in a day. Now imagine the benefit of doing that a hundred times on project...on a hundred projects.

DESIGN. MANUFACTURE. CONSTRUCT.

We are a single source for prefabricated medical modules. BLOX architects, fabricators and contractors are improving the way healthcare facilities are built. Our factory has a constant feedback loop that lets us make proactive corrections before it moves down the line. We do rigorous testing on the line. When sealed units arrive on the jobsite, they are pre-punched, pre-inspected, certified and connection-ready.

WE WORK WITH YOU.

We are nimble. BLOX can integrate at any point in the process. We can modularize your current design or work with you to create a new standard. BLOX makes single units, back to back, recessed in slab or flush; bathrooms, headwalls, footwalls, sinkwalls, and procedure rooms. We have no minimum number of units. We pre-coordinate with trades making install day safe, quick and uncomplicated.

BETTER. FASTER. EASIER.

BLOX created a continuous improvement framework to ensure highest quality. Our system delivers buildings 25% faster, saving you time and money, to serve more patients, sooner. BLOX simplifies design and construction, making your project safer, greener and leaner.
THE BUILDING BLOCKS OF BLOX.

BLOX builds project information in a real-time communication network available to the entire team. What you need and when you need it.

YOUR TOOLSET

BLOX simplifies the process by integrating project information in a working toolset. Organizing all the right information in one spot, we eliminate duplicated efforts between team members, saving time for everyone.

SYSTEMS

BLOX creates an integrated system for your project. Our visualization tools make it easy to understand the whole project. Your team can move fluidly from overview to detail, with the click of a mouse.

MODULES

BLOX creates drop-in BIM and CAD components for your planners, architects, engineers, builders and operators.

DETAIL

BLOX modules are four dimensional and smart. We embed scoping documents, regulatory submissions, shop drawings, installation sequencing, tolerances, construction templates, connection details, quality control manuals, warranties and maintenance manuals in your Toolset. Everything you need, all in one spot.
AN ELEGANT SOLUTION INSIDE AND OUT.

BLOX was founded by a team of architects and builders with thirty years of healthcare experience. We understand the issues cogent to the planning, design and construction of medical facilities and can help guide a solution that saves time and improves quality.
